

Quantum Cryptography “live” Demonstration in Vienna

the encrypted message is transferred from the Vienna City Hall to the headquarters of the Bank Austria - Creditanstalt

press conference
and demonstration of the ground-breaking experiment:
21 April 2004, 11:30, Vienna City Hall - Steinsaal

**world premiere:
bank transfer via quantum cryptography
based on entangled photons**

Albert Einstein's “spooky action at a distance” can now be adopted for an absolutely secure transfer of information. The quantum mechanical laws of nature - as opposed to complicated mathematical procedures - are what makes this method unbreakably safe!

Representatives of the concerned parties will be present and prepared for questions:

Mayor Dr. Michael Häupl - City of Vienna
Prof. Anton Zeilinger - Vienna University, Austrian Academy of Sciences
Prof. Erich Gornik - ARC Seibersdorf research GmbH
SR Dipl.-Ing. Helmut Kadrnoska - Wien Kanal Abwassertechnologien Ges.m.b.H.
Director Dr. Erich Hampel - Bank Austria Creditanstalt

We cordially invite you to attend this event.
